ToR Health Sector Advisor - Uganda

Background

Belgium has supported the Health Sector of Uganda with 18 million euros of sector budget support over the past 5 years and is a historical donor in the sector. It has contributed to the financing of the implementation of the HSSP II. The Belgian Development Cooperation is committed to a sector wide approach (SWAp) to health development and is, together with other actors, therefore advocating for co-ordination and partnership with all stakeholders involved in health sector.

Uganda approved during the 2010 Joint Review Mission the “Health Sector Strategic& Investment Plan 2010/11-2014/15” (HSSIP) and a new MoU, called Country Compact under the IHP+, was signed. Belgium has decided to engage further budget support to the health sector through HSSIP during the next two years with a possible additional contribution of 10 million euros.

Within this context, the Belgian Development Agency (BTC), responsible for monitoring of this support, will recruit a **“Health Sector Budget Support Advisor”**. Informing and working together with the Attaché for International Cooperation at the Belgian Embassy, who has the political responsibility of the Belgian support, he/she will provide input to the ongoing health policy and technical dialogue with the Government of Uganda. In coordination and liaison with the Health Development Partners (HDP) Group, the advisor will provide technical input to the health SWAp, HSSIP and the government’s reforms to be undertaken in the health sector.

Objectives

The Health Sector Budget Support Advisor will fulfil two main objectives:

- The expert will be in charge of the disbursement report that advises on the release of budget support installments.
- The expert will, in straight coordination with the Attaché and the HDP Group, monitor and follow up on Uganda’s health sector and contribute to advancing the health reform and HSSIP through policy dialogue. The expert will report on this monitoring.

- If and when required, provide the Attaché with information and advice on health-related matters arising within the Joint Budget Support Framework (JBSF).
- Make sure the new policies and/or critical issues raised regarding public health in technical working group (TWG) meetings are brought up, in due time, to the attention of the Attaché.
- Contribute actively to the existing technical coordination mechanisms of the Belgian support to the Health sector. Support capitalization in order to feed into future Belgian interventions through

documenting the implementation process and sharing experience; exchanging expertise and programme results with other BTC interventions and Belgian actors involved in the health sector and / or in budget support modalities

- Participate for the health sector in the meetings of the Joint Budget Support Framework (JBSF) Task Force if she/he gets the mandate of the HDP Group.
- Participate actively in the processes on the development and the realization of the Indicative Cooperation Programmes (ICP) in Uganda.

- Actively support donor coordination towards an active partnership approach to programme follow-up and policy dialogue with the Ugandan authorities, by providing support to the Attaché and the chair of the Health Development Partners group.
