## 1 PROJECT SHEET

## Basic Information on the Project

| Country: | Tanzania |
| :--- | :--- |
| DAC Sector and Sub Sector: | 41041030 |
| National or regional institution in charge <br> of the execution | Ministry of natural resources and tourism - <br> Wildlife Division. |
| Agencies in charge of the execution | Belgian Technical Cooperation |
| Project Number | TAN 0401111 (DGDC: 19891/11) |
| Duration of the project (According to <br> SA/SC): | 48 months $: 11 / 2012$ |
| Start date of the project | According to SA/SC: 24/11/2004 <br> Effective |
| End Date of the project | According to SA/SC : 11/2010 <br> Estimate |
| Project management Methods | Co-management |
| Project Total Budget | EURO 2,885,000 |
| Report Covering Period | Nov 2006 - Dec 2007 |

## 2 BRIEF FACTUAL OVERVIEW

The Kilombero Valley Flood Plain Ramsar Site Project aims to develop and implement an Integrated Management Plan (IMP) that will involve Kilombero and Ulanga districts. Through the implementation of this IMP, the project aims to maintain the ecological character of the Ramsar site while reducing the level of land use conflicts and improving the livelihoods of communities that depend on the wetlands for their socioeconomic well being. It is intended that at the end of the project, the livelihood of communities is significantly improved through the sustainable management, conservation and utilization of the wetlands natural resources.

The strategies to achieve this include

1. Resolving land use conflicts through improved land use planning activities.
2. Establishing natural resource based income generating activities at village household level.
3. Establishing / Strengthening local institutions to coordinated manage and develop key sectors of the local economy at the village and district level (e.g. beekeeping forestry, agriculture and fisheries)
4. Improving the efficiency of the district councils to implement the IMP in accordance with the Ramsar Convention.

The project aims to cover 31 villages - 21 in Kilombero District and 10 in Ulanga District with an estimated population of 73,198 and 39,414 respectively. The direct beneficiaries are the farmers, fishermen, pastoralists and beekeepers. The indirect beneficiaries are the National and District administrations, as well as the private sector that includes commercial foresters, sugar growers and tourist hunting companies.

The activities of the project are divided into four result areas as follows:

1. Integrated management plan of the Kilombero Valley Flood Plain Ramsar Site Developed
2. Implementation of the Integrated Management Plan of the Kilombero Valley Flood Plain Ramsar Site initiated
3. Contribution and wise use of the wetland resource in local economy of the Kilombero Flood Plain Ramsar Site is increased and sustained; and
4. Project managed efficiently and effectively.

It is envisaged that at the end of the project the Kilombero and Ulanga Districts will be in a position to develop and manage the Kilombero Wetland in an integrated manner.

During the reporting period, the activities mainly concerned result areas 1 and 4 as follows:

## 1. Integrated management plan of the Kilombero Valley Flood Plain Ramsar Site Developed

The project was introduced in all 31 villages at which time some basic information was also collected, e.g. existence / status of village environment committees, land use plans, etc. This was done through public meetings.

Districts Project Facilitation Team was trained on Ramsar Convention Obligations during a workshop facilitated by the Project Management Team. The training was for xxx days and xxx.
District Natural Resources Advisory boards were established in Kilombero and Ulanga districts. These are a prerequisite for the establishment of any Wildlife Management Areas (WMAs) in the future.
Expressions of interest for the undertaking of the baseline survey were called and three eligible candidates identified. Detailed TOR were developed which are to be sent to the three short listed candidates.

## 2. Implementation of the IMP of the Kilombero Valley Floodplain Ramsar Site initiated

The project facilitated establishment or strengthening of village natural resource committees in all villages. In addition, the selection of six wetland scouts/village was facilitated. This was done by conducting village meetings and training to the committee members in a number of villages.

## 4. Project managed efficiently and effectively.

During the reporting period, the Project Admin and Financial Officer (AFO) was recruited in March 2007 and the Project Driver in May 2007, when the project cars had arrived. Due to underperformance of the project management team, the whole team was replaced with the new AFO starting in December 2007 and new National Technical Advisor (NTA) being recruited in November for a start in January 2008.

Under Procurement only 3 project vehicles and computer equipment were purchased in the reporting period, with tender processes for the purchase of motorbikes and boats ongoing.

## 3 OVERVIEW OF ACTIVITY PLANNING

### 3.1 Activity overview

Table 1 illustrates the planned v/s implemented activities for 2007.

Table 1: Activity Implementation table

| Code | Result / Activity Description | Start-up |  |  |  |  | Implementation Phase |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | 2007 |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  | j | f | m | a | m | j | j | a | s | o | n | d | Status |
| R1 | IMP of the Kilombero Valley Flood Plain Ramsar Site Developed |  |  |  |  |  |  |  |  |  |  |  |  |  |
| R1A1 | Collect and collate existing baseline information on Kilombero Ramsar site. |  |  |  |  |  |  |  |  |  |  |  |  | Expressions of Interest (EoI) called received and evaluated. TORs prepared to be sent to qualified candidates. |
| R1A2 | Carry out baseline and inventory studies to fill gaps identified in activity R1A1 |  |  |  |  |  |  |  |  |  |  |  |  |  |
| R1A3 | Carry out annual livestock census in the wetland to establish wet and dry season status and distribution. |  |  |  |  |  |  |  |  |  |  |  |  |  |
| R1A4 | Carry out a systematic wet and dry season aerial surveys (in yrs 1 and 3) to establish status and distribution of wildlife populations in the Ramsar site. |  |  |  |  |  |  |  |  |  |  |  |  |  |
| R1A5 | Conduct survey of fisheries to determine number of villagers, fisher folks, and annual use patterns of Kilombero River. |  |  |  |  |  |  |  |  |  |  |  |  |  |
| R1A6 | Conduct awareness training on Ramsar convention obligations at village level. |  |  |  |  |  |  |  |  |  |  |  |  | Districts Project Facilitation Team trained on Ramsar Convention Obligations. |
| R1A7 | Preparation of village land use plans and resource management zones for the selected villages in the Ramsar site. |  |  |  |  |  |  |  |  |  |  |  |  |  |
| R1A8 | Carry out a strategic environmental assessment on major economic activities in the Ramsar site (targeting KVTC, Illovo, large scale rice farms, fisheries, livestock production etc.) |  |  |  |  |  |  |  |  |  |  |  |  |  |
| R1A9 | Support establishment of conflict arbitration and resolution committees at village level. |  |  |  |  |  |  |  |  |  |  |  |  |  |
| R1A10 | Preparation of by-laws governing wise use of natural resources in |  |  |  |  |  |  |  |  |  |  |  |  |  |

| Code | Result / Activity <br> Description | Start-up |  |  |  |  | Implementation Phase |  |  |  |  |  |  |  |

### 3.2 Analysis of activity planning (1 page)

For the first year the project planned a total of 41 activities under the four result areas. The activities ranged from basic scientific and socioeconomic studies, management planning to administration of the project. The planning process was based on the activities identified in the project's TFF. The work plan was developed, with the participation of members of the PFT of both districts. The activities planned were budgeted for within the threshold of expenditure allocation determined in the TFF.

The planning process had to consider various limitations including, seasonality and workload of the PFT members. It is important to consider timing of operation because during the rainy seasons (March - June) mobility within flood plain is highly constrained due to floods, also in the beginning of rainy seasons most community members spend most of their time in farms and thus they would not be available for engagement in the project activities. All PFT members are district council staff, thus the project work is addition to day to day commitments that they already have. Other limitations are the distance between villages and the distances between the project villages and district headquarters. The long distances necessitate a lot of traveling within the project area and in most cases require staff to spend nights in the project villages.

During the first JLPC in May 2007, the JLPC requested major revisions to the work plan and budgets, which were to be approved at an extraordinary JLPC meeting, shortly afterwards. However due to unavailability of the chairman of the JLPC who had to attend to other commitments, this meeting did not take place until August 2007. Nonetheless, the PMT had been instructed to carry on with crucial activities such as the baseline survey and other activities that were dependent on the dry season.

Unfortunately, the management team (Local Technical Advisor, Project Manager and AFO) did not function very well and there were breakdowns in communication within the team and between the team and the district authorities which led the JLPC to recommend at the end of August 2007 to replace the team. A new team was to be in place by early 2008. During the interim period the TA MNRT and DED Kilombero had been designated as signatories of the project account, while the outgoing project manager remained in place and assumed a caretaker position until the arrival of a new team. The difficulties within the PMT and the subsequent absence of a full management team significantly contributed to the delay of project activities.

## 4 FINANCIAL OVERVIEW

### 4.1 Overview of expenditure versus financial planning

The following table shows the budget that was approved by the extraordinary JLPC in August 2007 versus the expenditure to December 2007. Please note that some discrepancies between budget lines of planning and expenditure occurred due to the fact that the planning had been done according to the budget lines in the TFF, which do not exactly match those in the Financial Information Tool (FIT) of BTC, which is used in the financial reporting. These discrepancies have been noted and will be corrected for future reporting.

Table 2: Financial Report - Budget versus Expenditure

| Budget Code | Description | $\begin{gathered} \text { Budget } \\ 20007 \end{gathered}$ | $\begin{aligned} & \text { Expenditure } \\ & 2007 \end{aligned}$ | Balance $2007$ | $\begin{gathered} \% \\ \text { Expenditure } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| R1: Integrated Management Plan of the Kilombero Valley Flood Plain Ramsar Site Developed |  |  |  |  |  |
| A_01_01 | Baseline:-collect \& collate data | 36,194 | 807 | 35,387 | 2\% |

|  | Total Result 3 | 51,123 | 0 | 51,123 | 0\% |
| R4: Project implemented effectively and efficiently |  |  |  |  |  |
| Z_01_01 | Employment of project team | 59,307 | 59,445 | (138) | 100\% |
| Z_01_02 | Purchase of Equipment | 149,961 | 77,523 | 72,438 | 52\% |
| Z_01_03 | Mobilization of project team | 43,288 | 5,036 | 38,252 | 12\% |
| Z_01_04 | Mobilization of district team | 8,481 | 8,972 | (491) | 106\% |
| Z_01_05 | Operation/maintenance of transport | 41,546 | 20,226 | 21,320 | 49\% |
| Z_01_06 | Strengthening capacity of JLPC/IDCC | 3,555 | 5,754 | $(2,199)$ | 162\% |
| Z_01_07 | Operation/maintenance of project | 30,017 | 8,854 | 21,163 | 29\% |
| Z_01_08 | Project supervision and backstopping | 14,653 | 353 | 14,300 | 2\% |
| Z_01_09 | Monitoring and Evaluation* |  | 8,279 | $(8,279)$ |  |
| Z_01_10 | Bank charges-Regie |  | 1,059 | $(1,059)$ |  |
| Z_01_11 | Bank charges-Cogest |  | 559 | (559) |  |
|  | Total Result 4 | 350,808 | 196,060 | 154,748 | 56\% |
|  | GRAND TOTAL | 657,533 | 214,067 | 443,466 | 33\% |

### 4.2 Analysis of financial planning

The approved budget by the JLPC was $€ 653,084$ for project implementation during the reporting period. (In fact, the budget was for the financial year (2007/8). However, the majority of the field activities were to have taken place during the reporting period due the seasonal conditions.

The budgeting of the project activities was based on the TFF, with the approved budget by the JLPC of $€ 653,084$ for project implementation during the reporting period. (In fact, the budget was for the financial year (2007/8). The hiatus in project implementation that was caused by the change of the project management team has resulted in low level of implementation and thus low expenditure. The budget targeted facilitation of implementation of the activities that were deemed feasible for the first year. The actual expenditure at the end of the year 2007 was only $€ 214,066$. This represents only $33 \%$ of the planned expenditure covering the cost of 11 activities as shown in table 2 under section 4.1. It should be noted that the bulk of expenditure (72\%) was under general means.

As explained above, the posting of some activities will have to be reviewed. The negative amount on Z_01_06, for example, is due to a wrong posting. This budget line is only meant for capacity building of JLPC/IDCC, while the operation of the JLPC should have been posted to Z_01_08 Project supervision and backstopping. The review and corrections of all postings in the FIT will be undertaken in the first quarter of 2008. The amount under budget line Z_01_09, Monitoring and Evaluation represents the over expenditure during the formulation of the project, which the JLPC agreed to be charged to this budget line.

With a new management team in place is expected that the planning for 2008 will be more realistic and implementation pace will improve significantly.

## 5 MONITORING OF THE INDICATORS

### 5.1 Specific objective

The project's specific objective is: "Livelihood of the Kilombero Valley population is improved through sustainable conservation and utilization of wetland's resources."

### 5.2 Results

The project has four result areas that the project implementation should focus at. These are:

1. Integrated management plan of the Kilombero Valley Flood Plain Ramsar Site Developed.
2. The Integrated Management Plan of the Kilombero Valley Flood Plain Ramsar Site is implemented.
3. Contribution and wise use of the wetland resource in local economy of the Kilombero Flood Plain Ramsar Site is increased and sustained.
4. Project Implemented effectively and efficiently

### 5.3 Indicator evolution (chart)

A review of the indicators will form part of the baseline survey. The following table indicates the status of implementation against indicators from the TFF.

| Results | Results indicators | Means of verification | Status |
| :---: | :---: | :---: | :---: |
| RI. 1 Integrated management plan of the Kilombero Valley Flood Plain Ramsar Site Developed. | Integrated Management Plan in place in two years from commencement of the project <br> Number of key management decisions made based on Data from Natural Resources Information System during preparation of district strategic and annual plans <br> Strategies identified in the IMP incorporated in District Strategic/development Plans by the end of the project and funds for their implementation allocated <br> Key species habitats fully rehabilitated and maintained from the base line status | Progress reports <br> District strategic, development plans <br> Minutes of PFT meetings <br> Minutes of full council meetings. <br> District annual plans | IMP development delayed due to slow implementation pace. <br> Development of Information System planned for FY 2008/9 <br> IMP not developed yet |
| RI. 2 The Integrated Management Plan of the Kilombero Valley Flood Plain Ramsar Site is implemented | Inter District Coordinating Committee functioning efficiently by Year 4 <br> Strategies identified in IMP are included in the District Strategic Plans and translated to activities in Annual Plans by the end of the project. <br> Number of land use plans prepared and implemented <br> Number of By laws formulated and enforced. <br> Progress of implementation of Land Use plans at village level monitored at least twice / year <br> Levels and sources of conflicts in pilot villages reduced by $50 \%$ from the current base (monitored at least twice / year). <br> Full council approves by-laws governing village land use plans. | Inter District Coordinating Committee functioning efficiently by Year 4 <br> Strategies identified in IMP are included in the District Strategic Plans and translated to activities in Annual Plans by the end of the project. <br> Number of land use plans prepared and implemented <br> Number of By laws formulated and enforced. <br> Progress of implementation of Land Use plans at village level monitored at least twice / year <br> Levels and sources of conflicts in pilot villages reduced by $50 \%$ from the current base (monitored at least twice / year). <br> Full council approves by-laws governing village land use plans. | Land use planning will take place FY 2008/9 <br> Baseline to be established in June 2008 |
| RI. 3 Contribution and wise use of the wetland resource in local economy of the Kilombero Flood Plain Ramsar Site is increased and sustained. | Livestock numbers maintained within approved stocking rates in the selected villages within the Ramsar site by end of project. <br> Amount of yields of major crops per unit area increased by $30 \%$ by end of the project. <br> Number of beekeepers from selected villages within the Ramsar site increases by a maximum of 100 from baseline | - Livestock survey reports <br> - Registration of associations <br> - Agricultural inputs survey <br> - District Development plans <br> - District Strategic Plan <br> - District annual reports <br> - District Natural Resources Information System |  |

|  | survey by end of project. <br> Significant increase in <br> production (quantity and quality) <br> of bee products/ <br> Three fisher folk associations <br> formed and operational by end <br> of the project period. |  |  |
| RI.4 Project Implemented |  |  |  |
| effectively and efficiently | Annual fish production in Year 4 <br> increased over baseline value in <br> Year 1 | Annual work plans and budgets <br> timely approved by JLPC | Approved document <br> Monitoring and evaluation <br> reports <br> Annual implementation <br> reports based on work <br> plans |

## 6 ASSESSMENT OF MONITORING CRITERIA

### 6.1 Efficiency

The project efficiency has significantly been affected by the major changes in the project implementation team where NTA and AFO were laid off in September 2007. The PM could not process payments and a local account was not replenished adequately. The project activities were generally stalled. The project implementation became difficult

### 6.2 Effectiveness

It is too early to evaluate project effectiveness. In spite of the fact that the project has been operational for the past one year the activities are still in start up phase.

### 6.3 Sustainability

The sustainability of project activities will depend upon successful involvement of various stakeholders including districts staff, communities and local government. It will also depend upon the availability of resources to facilitate plan implementation and review that will take project activities beyond the project life.

## 7 MEASURES AND RECOMMENDATIONS

### 7.1 Overview of the assessment criteria

The project is practically still in its start up phase. The project has been constrained by the major changes in the leadership of the project implementation team. However the change of the leadership should be facilitated such that the transit

### 7.2 Recommendations

The project is very much behind in implementation; therefore the incoming project management team should take the challenge and ensure that the project activities are implemented so that the project makes progress. The team should be facilitated with the resources, especially timely disbursement of funds to the local account.

The procurement of various goods and services has been delayed. The reasons are either breakdown of communication between BTC and District governments or contradictions or lack of clarity of procedures between parties involved in project execution. It is important therefore, that the communication be improved and the procurement is hastened. It is important that the renovations of office building start as soon as possible, the office furniture are procured and procurement of motorbikes and boats are finalized.

## 8 PLANNING FOR THE UPCOMING YEAR (2008)

### 8.1 Activity planning 2008

| KILOMBERO VALLEY FLOOD PLAIN RAMSAR SITE |  | ACTIVITY PLAN 2008 |  |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Activities | Budget Code | Sub activities | J | F | M | A | M | J | J | A | S | 0 | N | D |
| Result Area 1: Integrated Management Plan of Kilombero Valley Flood Plain Ramsar Site developed. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| Collect and collate baseline data and carry out surveys to fill gaps | A/R1/BL01 | Collect and collate data and carryout field surveys to fill gaps |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  | Conduct meeting to receive and discuss baseline reports |  |  |  |  |  |  |  |  |  |  |  |  |
| Carry out annual livestock census in the wetland to establish wet and dry season distribution | A/R1/BL02 | Awareness raising to livestock keepers on the importance of census and distribution of livestock data sheets in 31 villages. |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  | Carry out livestock inventory (21,000 data sheets) and data analysis in 31 villages |  |  |  |  |  |  |  |  |  |  |  |  |
| Carry out a systematic wet and dry season aerial surveys (in yrs 1 and 3) to establish status and distribution of wildlife populations in the Ramsar site. | A/R1/BL03 | To conduct of aerial surveys and ground truthing (wet and dry season) of the Ramsar site |  |  |  |  |  |  |  |  |  |  |  |  |
| Conduct survey of fisheries to determine number of villages' fisher folks and annual use patterns of Kilombero River. | A/R1/BL04 | Carry out fishery survey to determine villager fisher folks and use pattern in Kilombero river |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  | Conduct meetings to receive and discuss fishery reports |  |  |  |  |  |  |  |  |  |  |  |  |
| Conduct awareness training on Ramsar convention obligations at village level. | A/R1/BL05 | Develop a training programme on public awareness on Ramsar |  |  |  |  |  |  |  |  |  |  |  |  |

## 9 CONCLUSIONS

### 9.1 Activities and Finance

As has been stated elsewhere in this report the project implementation and expenditure have been very low. Efforts to increase the scale and pace of project implementation are being made.

### 9.2 Monitoring criteria

### 9.2.1 Efficiency

Project Efficiency need to be improved so that the activities are implemented timely and adequately in order to achieve the desired goals and objectives.

### 9.2.2 Effectiveness

Effectiveness of the project will be based on how the stakeholders in all level will be able to participate in project implementation and deliver the management plan and associated benefits to the local communities.

### 9.2.3 Sustainability

Sustainability of the project is vital and that should be vigorously pursued. However this will depend upon how the project deliver its activities to the communities and the resources allocated to the project activities after the project. 9.3 Advice of the JLPC on the recommendations

### 9.3 Recommendations by JLPC

### 9.3.1 Recommendations on activity planning

PMT was asked to outsource some activities as a means to speed up implementation and to build capacity.

### 9.3.2 Recommendations on financial planning

The PMT was instructed to adjust the activities/project budget so that the districts' cash contributions to match the amounts that were already requested from treasury.

The meeting noted that large percentage of the budget appears in Result 4; therefore it instructed PMT to provide a breakdown of different items in that Result area showing where the money will be spent, e.g. fuel, per diems.

The JLPC instructed PMT to minimize per diems to the level necessary for implementation of project activities.

BTC will review GoB contribution as there was not sufficient time to do this before this meeting. The revised budget will then be presented to MNRT and BTC for final approval.

### 9.3.3 Recommendations on Logical Framework

There were no specific recommendations on the logical framework from this JLPC.

### 9.3.4 Other recommendations

## Land use planning

PMT proposed to carry out land use planning in a total of 47 villages so that to cover the entire ecological zone. This is possible within the existing budget line for land use planning. In the first instance, within FY 2008/9 land use planning will be carried out in 19 villages within the priority areas of Kibasira and Funga swamps, out of these 9 villages which were not in project will benefit from this exercise. It is anticipated that this will increase the chances of the project's success and sustainability.

The JLPC meeting approved the proposal. Other activities in additional villages will be subject to a detailed costing that will be prepared by the PMT and districts to be considered in the next Bilateral Development Program at the end of the year 2008.

## Procurement of motorcycles and boats

The JLPC decided that the procurement process should be done according to the procedure used for the procurement of the project cars, which was done through a committee comprising of BTC, the Kilombero and Ulanga districts and MNRT, according to Article 35 of the Tanzania's Public Procurement Act (2004)

## Mid-term review

The PMT was instructed to include a mid term- review in early 2009 in their work plan and budget.

## Communication, visibility of the project

Project team was instructed to plan and budget for activities that increase visibility of the project.

## Motivation for project managers

It was recommended that the project provide increased financial incentives to Project Manager to recognize the work load and contribution of Project Managers who are Government of Tanzania employees seconded to the project. The meeting agreed that this matter is important to be looked at. It was agreed to hold a meeting between BTC, EoB, MoFEA and MNRT to discuss this matter.

## 10 ANNEXES

Tracking Gantt view / Activities
Baseline report / Activities (Adept Tracker)
Baseline survey is yet to be carried out. Efforts will made so that the activity can be accomplished in second quarter of 2008.

Measuring indicators
Checklist efficiency
Checklist effectiveness
Checklist sustainability

## Input in PIT

Logical framework year
Overview public contracts
During the reporting period three public contracts, listed below, were advertised by the project. Of the three, only one, the procurement of project cars, was completed. The remaining two are still being pursued.

- Procurement of project cars
- Procurement of Motorbike and Boats
- Consultants for Baseline Survey

## 2 BRIEF FACTUAL OVERVIEW

The Kilombero Valley Flood Plain Ramsar Site Project aims to develop and implement an Integrated Management Plan (IMP) that will involve Kilombero and Ulanga districts. Through the implementation of this IMP, the project aims to maintain the ecological character of the Ramsar site while reducing the level of land use conflicts and improving the livelihoods of communities that depend on the wetlands for their socioeconomic well being. It is intended that at the end of the project, the livelihood of communities is significantly improved through the sustainable management, conservation and utilization of the wetlands natural resources.

The strategies to achieve this include

1. Resolving land use conflicts through improved land use planning activities.
2. Establishing natural resource based income generating activities at village household level.
3. Establishing / Strengthening local institutions to coordinated manage and develop key sectors of the local economy at the village and district level (e.g. beekeeping forestry, agriculture and fisheries)
4. Improving the efficiency of the district councils to implement the IMP in accordance with the Ramsar Convention.

The project aims to cover 31 villages - 21 in Kilombero District and 10 in Ulanga District with an estimated population of 73,198 and 39,414 respectively. The direct beneficiaries are the farmers, fishermen, pastoralists and beekeepers. The indirect beneficiaries are the National and District administrations, as well as the private sector that includes commercial foresters, sugar growers and tourist hunting companies.

The activities of the project are divided into four result areas as follows:

1. Integrated management plan of the Kilombero Valley Flood Plain Ramsar Site Developed
2. Implementation of the Integrated Management Plan of the Kilombero Valley Flood Plain Ramsar Site initiated
3. Contribution and wise use of the wetland resource in local economy of the Kilombero Flood Plain Ramsar Site is increased and sustained; and
4. Project managed efficiently and effectively.

It is envisaged that at the end of the project the Kilombero and Ulanga Districts will be in a position to develop and manage the Kilombero Wetland in an integrated manner.

During the reporting period, the activities mainly concerned result areas 1 and 4 as follows:

## 1. Integrated management plan of the Kilombero Valley Flood Plain Ramsar Site Developed

The project was introduced in all 31 villages at which time some basic information was also collected, e.g. existence / status of village environment committees, land use plans, etc. This was done through public meetings.

Districts Project Facilitation Team was trained on Ramsar Convention Obligations during a workshop facilitated by the Project Management Team. The training was for xxx days and xxx.
District Natural Resources Advisory boards were established in Kilombero and Ulanga districts. These are a prerequisite for the establishment of any Wildlife Management Areas (WMAs) in the future.
Expressions of interest for the undertaking of the baseline survey were called and three eligible candidates identified. Detailed TOR were developed which are to be sent to the three short listed candidates.

## 2. Implementation of the IMP of the Kilombero Valley Floodplain Ramsar Site initiated

The project facilitated establishment or strengthening of village natural resource committees in all villages. In addition, the selection of six wetland scouts/village was facilitated. This was done by conducting village meetings and training to the committee members in a number of villages.

## 4. Project managed efficiently and effectively.

During the reporting period, the Project Admin and Financial Officer (AFO) was recruited in March 2007 and the Project Driver in May 2007, when the project cars had arrived. Due to underperformance of the project management team, the whole team was replaced with the new AFO starting in December 2007 and new National Technical Advisor (NTA) being recruited in November for a start in January 2008.

Under Procurement only 3 project vehicles and computer equipment were purchased in the reporting period, with tender processes for the purchase of motorbikes and boats ongoing.

## 3 OVERVIEW OF ACTIVITY PLANNING

### 3.1 Activity overview

Table 1 illustrates the planned v/s implemented activities for 2007.

Table 1: Activity Implementation table

| Code | Result / Activity Description | Start-up |  |  |  |  | Implementation Phase |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

### 3.2 Analysis of activity planning (1 page)

For the first year the project planned a total of 41 activities under the four result areas. The activities ranged from basic scientific and socioeconomic studies, management planning to administration of the project. The planning process was based on the activities identified in the project's TFF. The work plan was developed, with the participation of members of the PFT of both districts. The activities planned were budgeted for within the threshold of expenditure allocation determined in the TFF.

The planning process had to consider various limitations including, seasonality and workload of the PFT members. It is important to consider timing of operation because during the rainy seasons (March - June) mobility within flood plain is highly constrained due to floods, also in the beginning of rainy seasons most community members spend most of their time in farms and thus they would not be available for engagement in the project activities. All PFT members are district council staff, thus the project work is addition to day to day commitments that they already have. Other limitations are the distance between villages and the distances between the project villages and district headquarters. The long distances necessitate a lot of traveling within the project area and in most cases require staff to spend nights in the project villages.

During the first JLPC in May 2007, the JLPC requested major revisions to the work plan and budgets, which were to be approved at an extraordinary JLPC meeting, shortly afterwards. However due to unavailability of the chairman of the JLPC who had to attend to other commitments, this meeting did not take place until August 2007. Nonetheless, the PMT had been instructed to carry on with crucial activities such as the baseline survey and other activities that were dependent on the dry season.

Unfortunately, the management team (Local Technical Advisor, Project Manager and AFO) did not function very well and there were breakdowns in communication within the team and between the team and the district authorities which led the JLPC to recommend at the end of August 2007 to replace the team. A new team was to be in place by early 2008. During the interim period the TA MNRT and DED Kilombero had been designated as signatories of the project account, while the outgoing project manager remained in place and assumed a caretaker position until the arrival of a new team. The difficulties within the PMT and the subsequent absence of a full management team significantly contributed to the delay of project activities.

## 4 FINANCIAL OVERVIEW

### 4.1 Overview of expenditure versus financial planning

The following table shows the budget that was approved by the extraordinary JLPC in August 2007 versus the expenditure to December 2007. Please note that some discrepancies between budget lines of planning and expenditure occurred due to the fact that the planning had been done according to the budget lines in the TFF, which do not exactly match those in the Financial Information Tool (FIT) of BTC, which is used in the financial reporting. These discrepancies have been noted and will be corrected for future reporting.

Table 2: Financial Report - Budget versus Expenditure

### 4.2 Analysis of financial planning

The approved budget by the JLPC was $€ 653,084$ for project implementation during the reporting period. (In fact, the budget was for the financial year (2007/8). However, the majority of the field activities were to have taken place during the reporting period due the seasonal conditions.

The budgeting of the project activities was based on the TFF, with the approved budget by the JLPC of $€ 653,084$ for project implementation during the reporting period. (In fact, the budget was for the financial year (2007/8). The hiatus in project implementation that was caused by the change of the project management team has resulted in low level of implementation and thus low expenditure. The budget targeted facilitation of implementation of the activities that were deemed feasible for the first year. The actual expenditure at the end of the year 2007 was only $€ 214,066$. This represents only $33 \%$ of the planned expenditure covering the cost of 11 activities as shown in table 2 under section 4.1. It should be noted that the bulk of expenditure (72\%) was under general means.

As explained above, the posting of some activities will have to be reviewed. The negative amount on Z_01_06, for example, is due to a wrong posting. This budget line is only meant for capacity building of JLPC/IDCC, while the operation of the JLPC should have been posted to Z_01_08 Project supervision and backstopping. The review and corrections of all postings in the FIT will be undertaken in the first quarter of 2008. The amount under budget line Z_01_09, Monitoring and Evaluation represents the over expenditure during the formulation of the project, which the JLPC agreed to be charged to this budget line.

With a new management team in place is expected that the planning for 2008 will be more realistic and implementation pace will improve significantly.

## 5 MONITORING OF THE INDICATORS

### 5.1 Specific objective

The project's specific objective is: "Livelihood of the Kilombero Valley population is improved through sustainable conservation and utilization of wetland's resources."

### 5.2 Results

The project has four result areas that the project implementation should focus at. These are:

1. Integrated management plan of the Kilombero Valley Flood Plain Ramsar Site Developed.
2. The Integrated Management Plan of the Kilombero Valley Flood Plain Ramsar Site is implemented.
3. Contribution and wise use of the wetland resource in local economy of the Kilombero Flood Plain Ramsar Site is increased and sustained.
4. Project Implemented effectively and efficiently

### 5.3 Indicator evolution (chart)

A review of the indicators will form part of the baseline survey. The following table indicates the status of implementation against indicators from the TFF.

| Results | Results indicators | Means of verification | Status |
| :---: | :---: | :---: | :---: |
| RI. 1 Integrated management plan of the Kilombero Valley Flood Plain Ramsar Site Developed. | Integrated Management Plan in place in two years from commencement of the project <br> Number of key management decisions made based on Data from Natural Resources Information System during preparation of district strategic and annual plans <br> Strategies identified in the IMP incorporated in District Strategic/development Plans by the end of the project and funds for their implementation allocated <br> Key species habitats fully rehabilitated and maintained from the base line status | Progress reports <br> District strategic, development plans <br> Minutes of PFT meetings <br> Minutes of full council meetings. <br> District annual plans | IMP development delayed due to slow implementation pace. <br> Development of Information System planned for FY 2008/9 <br> IMP not developed yet |
| RI. 2 The Integrated Management Plan of the Kilombero Valley Flood Plain Ramsar Site is implemented | Inter District Coordinating Committee functioning efficiently by Year 4 <br> Strategies identified in IMP are included in the District Strategic Plans and translated to activities in Annual Plans by the end of the project. <br> Number of land use plans prepared and implemented <br> Number of By laws formulated and enforced. <br> Progress of implementation of Land Use plans at village level monitored at least twice / year <br> Levels and sources of conflicts in pilot villages reduced by $50 \%$ from the current base (monitored at least twice / year). <br> Full council approves by-laws governing village land use plans. | Inter District Coordinating Committee functioning efficiently by Year 4 <br> Strategies identified in IMP are included in the District Strategic Plans and translated to activities in Annual Plans by the end of the project. <br> Number of land use plans prepared and implemented <br> Number of By laws formulated and enforced. <br> Progress of implementation of Land Use plans at village level monitored at least twice / year <br> Levels and sources of conflicts in pilot villages reduced by $50 \%$ from the current base (monitored at least twice / year). <br> Full council approves by-laws governing village land use plans. | Land use planning will take place FY 2008/9 <br> Baseline to be established in June 2008 |
| RI. 3 Contribution and wise use of the wetland resource in local economy of the Kilombero Flood Plain Ramsar Site is increased and sustained. | Livestock numbers maintained within approved stocking rates in the selected villages within the Ramsar site by end of project. <br> Amount of yields of major crops per unit area increased by $30 \%$ by end of the project. <br> Number of beekeepers from selected villages within the Ramsar site increases by a maximum of 100 from baseline | - Livestock survey reports <br> - Registration of associations <br> - Agricultural inputs survey <br> - District Development plans <br> - District Strategic Plan <br> - District annual reports <br> - District Natural Resources Information System |  |

| Results | Results indicators | Means of verification |  |
| :--- | :--- | :--- | :--- |
|  | survey by end of project. <br> Significant increase in <br> production (quantity and quality) <br> of bee products/ <br> Three fisher folk associations <br> formed and operational by end <br> of the project period. |  |  |
| RI.4 Project Implemented |  |  |  |
| effectively and efficiently | Annual fish production in Year 4 <br> increased over baseline value in <br> Year 1 | Annual work plans and budgets <br> timely approved by JLPC | Approved document <br> Monitoring and evaluation <br> reports <br> Annual implementation <br> reports based on work <br> plans |

## 6 ASSESSMENT OF MONITORING CRITERIA

### 6.1 Efficiency

The project efficiency has significantly been affected by the major changes in the project implementation team where NTA and AFO were laid off in September 2007. The PM could not process payments and a local account was not replenished adequately. The project activities were generally stalled. The project implementation became difficult

### 6.2 Effectiveness

It is too early to evaluate project effectiveness. In spite of the fact that the project has been operational for the past one year the activities are still in start up phase.

### 6.3 Sustainability

The sustainability of project activities will depend upon successful involvement of various stakeholders including districts staff, communities and local government. It will also depend upon the availability of resources to facilitate plan implementation and review that will take project activities beyond the project life.

## 7 MEASURES AND RECOMMENDATIONS

### 7.1 Overview of the assessment criteria

The project is practically still in its start up phase. The project has been constrained by the major changes in the leadership of the project implementation team. However the change of the leadership should be facilitated such that the transit

### 7.2 Recommendations

The project is very much behind in implementation; therefore the incoming project management team should take the challenge and ensure that the project activities are implemented so that the project makes progress. The team should be facilitated with the resources, especially timely disbursement of funds to the local account.

The procurement of various goods and services has been delayed. The reasons are either breakdown of communication between BTC and District governments or contradictions or lack of clarity of procedures between parties involved in project execution. It is important therefore, that the communication be improved and the procurement is hastened. It is important that the renovations of office building start as soon as possible, the office furniture are procured and procurement of motorbikes and boats are finalized.

## 8 PLANNING FOR THE UPCOMING YEAR (2008)

### 8.1 Activity planning 2008

| KILOMBERO VALLEY FLOOD PLAIN RAMSAR SITE |  | ACTIVITY PLAN 2008 |  |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Activities | Budget Code | Sub activities | J | F | M | A | M | J | J | A | S | 0 | N | D |
| Result Area 1: Integrated Management Plan of Kilombero Valley Flood Plain Ramsar Site developed. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| Collect and collate baseline data and carry out surveys to fill gaps | A/R1/BL01 | Collect and collate data and carryout field surveys to fill gaps |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  | Conduct meeting to receive and discuss baseline reports |  |  |  |  |  |  |  |  |  |  |  |  |
| Carry out annual livestock census in the wetland to establish wet and dry season distribution | A/R1/BL02 | Awareness raising to livestock keepers on the importance of census and distribution of livestock data sheets in 31 villages. |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  | Carry out livestock inventory (21,000 data sheets) and data analysis in 31 villages |  |  |  |  |  |  |  |  |  |  |  |  |
| Carry out a systematic wet and dry season aerial surveys (in yrs 1 and 3) to establish status and distribution of wildlife populations in the Ramsar site. | A/R1/BL03 | To conduct of aerial surveys and ground truthing (wet and dry season) of the Ramsar site |  |  |  |  |  |  |  |  |  |  |  |  |
| Conduct survey of fisheries to determine number of villages' fisher folks and annual use patterns of Kilombero River. | A/R1/BL04 | Carry out fishery survey to determine villager fisher folks and use pattern in Kilombero river |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  | Conduct meetings to receive and discuss fishery reports |  |  |  |  |  |  |  |  |  |  |  |  |
| Conduct awareness training on Ramsar convention obligations at village level. | A/R1/BL05 | Develop a training programme on public awareness on Ramsar |  |  |  |  |  |  |  |  |  |  |  |  |

## 9 CONCLUSIONS

### 9.1 Activities and Finance

As has been stated elsewhere in this report the project implementation and expenditure have been very low. Efforts to increase the scale and pace of project implementation are being made.

### 9.2 Monitoring criteria

### 9.2.1 Efficiency

Project Efficiency need to be improved so that the activities are implemented timely and adequately in order to achieve the desired goals and objectives.

### 9.2.2 Effectiveness

Effectiveness of the project will be based on how the stakeholders in all level will be able to participate in project implementation and deliver the management plan and associated benefits to the local communities.

### 9.2.3 Sustainability

Sustainability of the project is vital and that should be vigorously pursued. However this will depend upon how the project deliver its activities to the communities and the resources allocated to the project activities after the project. 9.3 Advice of the JLPC on the recommendations

### 9.3 Recommendations by JLPC

### 9.3.1 Recommendations on activity planning

PMT was asked to outsource some activities as a means to speed up implementation and to build capacity.

### 9.3.2 Recommendations on financial planning

The PMT was instructed to adjust the activities/project budget so that the districts' cash contributions to match the amounts that were already requested from treasury.

The meeting noted that large percentage of the budget appears in Result 4; therefore it instructed PMT to provide a breakdown of different items in that Result area showing where the money will be spent, e.g. fuel, per diems.

The JLPC instructed PMT to minimize per diems to the level necessary for implementation of project activities.

BTC will review GoB contribution as there was not sufficient time to do this before this meeting. The revised budget will then be presented to MNRT and BTC for final approval.

### 9.3.3 Recommendations on Logical Framework

There were no specific recommendations on the logical framework from this JLPC.

### 9.3.4 Other recommendations

## Land use planning

PMT proposed to carry out land use planning in a total of 47 villages so that to cover the entire ecological zone. This is possible within the existing budget line for land use planning. In the first instance, within FY 2008/9 land use planning will be carried out in 19 villages within the priority areas of Kibasira and Funga swamps, out of these 9 villages which were not in project will benefit from this exercise. It is anticipated that this will increase the chances of the project's success and sustainability.

The JLPC meeting approved the proposal. Other activities in additional villages will be subject to a detailed costing that will be prepared by the PMT and districts to be considered in the next Bilateral Development Program at the end of the year 2008.

## Procurement of motorcycles and boats

The JLPC decided that the procurement process should be done according to the procedure used for the procurement of the project cars, which was done through a committee comprising of BTC, the Kilombero and Ulanga districts and MNRT, according to Article 35 of the Tanzania's Public Procurement Act (2004)

## Mid-term review

The PMT was instructed to include a mid term- review in early 2009 in their work plan and budget.

## Communication, visibility of the project

Project team was instructed to plan and budget for activities that increase visibility of the project.

## Motivation for project managers

It was recommended that the project provide increased financial incentives to Project Manager to recognize the work load and contribution of Project Managers who are Government of Tanzania employees seconded to the project. The meeting agreed that this matter is important to be looked at. It was agreed to hold a meeting between BTC, EoB, MoFEA and MNRT to discuss this matter.

## 10 ANNEXES

Tracking Gantt view / Activities
Baseline report / Activities (Adept Tracker)
Baseline survey is yet to be carried out. Efforts will made so that the activity can be accomplished in second quarter of 2008.

Measuring indicators
Checklist efficiency
Checklist effectiveness
Checklist sustainability

## Input in PIT

Logical framework year
Overview public contracts
During the reporting period three public contracts, listed below, were advertised by the project. Of the three, only one, the procurement of project cars, was completed. The remaining two are still being pursued.

- Procurement of project cars
- Procurement of Motorbike and Boats
- Consultants for Baseline Survey
