Comment

In Vietnam, the number of female applicants for scholarship is always higher than the number of male ones. Thanks for the policy to prioritise women in selection, female scholarship holder always outnumber male ones, especially under the master training scholarship scheme.

To reach the gender equality goal, the following measures were used:

1. The call for applicants states that: "women and people from rural and remoted area are encouraged to apply". This resulted in a high number of female applicants ;

2. During both pre-selection and selection process, gender balance was considered as one important criteria for selection. Women candidates therefore given bonus in the selection and is prioritised if having the same mark as men.

Comment

The selection in 2014 followed the selection policies of UNI20XX/01 set by DGD in Vietnam, that gives priority to the following sectors: *basic infrastructure, health, education, agriculture, governance and engineering*. New focus area for development cooperation according to ICP 2011 - 2015 including water resource management, environment, climate change, urbanization, engineering, and governance are also intergrated in these prioritised sectors.

Agents working in public organisations in those sectors also received bonus during selection process.

C.2. Intervention areas

Intervention areas	Vietnam
Capital	Yes
Outside areas	Yes
No taken into account during the selection	x

Comment

Even though candidates from outside of the two biggest cities in Vietnam (Hanoi and Ho Chi Minh city) were given bonus during the selection process, the number of applicants and shortlisted candidates from these two cities were still much higher than ones from rural area. This is because candidates from big cities are more likely to have better education, good working experience, have better interview skills and therefore able to demonstrate better their capacities through out the selection process. In the final selection result for new master scholars in 2014, 24/25 scholarship holders were from Hanoi and Ho Chi Minh city, only one was from Hue (also a big city in the centre of the country).

D. Geographical location of the trainings

	Closed under UNI20XX/01	Continued on VIE1188811	Total
BELGIUM	55	52	107

100% of the scholarships in 2014 under UNI20XX/01 and VIE1188811 were implemented in Belgium.

III. Key points – Weak points – Recommendations

The signature of the Specific agreement for VIE1188811 were delayed until end of December 2014, that lead to certain delays in selection of master scholars for the year. Eventhough the budget allow 30 awards, only 25 scholarship contracts were concluded.

Selection of new awards were carried out the same as with UNI20XX/01 i.e. by the beneficiary organisations for short trainings and by DGD and BTC for master trainings. The selection criteria were also keep the same as the one used by UNI20XX/01.

For implementation of the scholarship, BTC Hanoi continues to receive support from the BTC scholarship unit that was an important liason with belgian universities and provided great support for scholarship holders.

Key points	Weak points
<ul style="list-style-type: none"> - The scholarship for master study was open for young professionals from Vietnam to pursue high quality master studies in Belgium and gain new expertise for the benefit of their country. - The selection criteria includes priorities for focus area of Belgian cooperation in Vietnam - The selection process took into consideration geographical, sectoral and institutional balance of all selected courses - Most of returned scholarship holders appreciate the quality of training in Belgium and have good sentiment to the Belgian development cooperation in Vietnam. 	<ul style="list-style-type: none"> - There's no diffrentiation of targeted applicants categories. The selection process is base on the competitiveness of candidates qualification. Candidates from big cities therefore have more chance to win the scholarship rather than ones from rulral and remote areas - The scholarship for both short traineeship and master training are given on individual basis. It is therefore difficult to mesure impact of the program at organisational level. - There's no systematic tracking for changes and contributions from belgian alumni to the development of Vietnam

Recommandations

The FCB design aims to promote human resources development in general and selected organisational development, onwnership of local partner and a M&E system to systematically evaluate the effectiveness of the intervention. However, the budget of FCB only allow one new selection of 2015 for master studies while the project will be put operation in early 2015. It would be ideal that the VIE1188811 budget is replenished soon to allow new selections in

2016 and the following years. This would help to fix the framework for this intervention and facilitate measurement of any possible impact.

MINUTES OF THE MEETING ON THE RESULTS OF 2014 BILATERAL SCHOLARSHIPS FOR VIETNAM

On 22nd April 2014, a meeting between DGD and BTC was held at the Belgian Embassy in Hanoi. The objective of the meeting was to finalize and agree on the selection results for the scholarships program, Intake 2014. Participating in the meeting were:

For DGD under the Belgian Embassy in Hanoi:

- 1) Mr. Geert Vansintjan, Counsellor for Development Cooperation
- 2) Mrs. Ngo Thu Huong, Attaché-adjoint of Development Cooperation

For BTC Vietnam:

- 1) Mr. Alain Devaux, Resident Representative
- 2) Mrs. Tran Thi Thanh Huong, Programme Officer

It was acknowledged that the selection had been carried out in conformity with the guidelines of DGD and BTC. In particular, all application files had been examined and screened on the basis of their completeness, selection criteria set out by DGD and BTC. The interviews of eligible candidates were conducted jointly by a jury board composed of representatives from both DGD at the Belgian Embassy in Hanoi and BTC Vietnam.

Based on the interview scores, thirty (30) best candidates have been selected for Master studies available for the academic year 2014-2015. The final decision has been made with thorough consideration of the balance among geographical areas, institutions and selected programs. The Reserve List includes fifteen (15) candidates.

The lists of Official and Reserve Candidates are attached to these minutes. The list of non-selected candidates is not included herewith but available at the Belgian Embassy in Hanoi.

The minutes are done by the Belgian Embassy in Hanoi on the same date.
